## Fitting Tubz Sanitising bracket to any Tower.

The bracket is designed to fit a 100ml bottle up to 105 mm tall. This is so we have flexibility in sourcing the most cost efficient bottles from various suppliers. The bottles we have initially supplied with the bracket is slightly shorter so we have provided a spacer disc to ensure it fits perfectly in the bracket.

Insert bracket screw studs into the 2 holes you have drilled.

Now fix the bracket by placing the bracing bar over the 2 stud thread bolts that are now protruding on the inside of the tower base. Then put the 2 small washers over the bolts and finally screw the wing nuts and tighten

# SPRAY

## ANTI-BACTERIAL

Tubz Brands have developed Hand & Touch Point Sanitiser to fit your existing Tubz vending Towers that is **lab tested to kill bacteria and enveloped viruses, including Coronavirus, on surfaces and the skin.**

This Sanitising solution has been formulated to solve “tomorrows problem” as people start to come back to your venue to help ensure your customers can easily sanitise their hands after vending their favourite Tubz products.

Tubz Sanitiser forms a covalent bond with the surface and this creates a very strong, long lasting effect that helps prevent the spread of viruses to other surfaces through your venue!
